Tools and Platforms: VS Code, Git
Core Concepts: OOPS, Problem Solving, Exception Handling

PROJECTS

Medical Image Denoising using Deep Learning (Final Year Project)

- Led a team to design and develop a deep learning-based medical image denoising system.
- Proposed and implemented the project using CNN and Double U-Net architecture.
- Enhanced image quality while preserving critical structural details for diagnosis.
- Gained hands-on experience in model training, evaluation, and image enhancement techniques.

Weed Detection using Image Processing (Mini Project)

- Developed a weed detection system using Python, OpenCV, and YOLOv3.
- Applied image segmentation and object detection for real-time classification.
- Strengthened knowledge in computer vision and machine learning concepts.

INTERNSHIP AND WORKSHOP

Full Stack Web Development Intern, Recesar Pvt. Ltd. – 2024

- Learned front-end and back-end development fundamentals.
- Worked on integrating user interface components with backend logic.
- Gained exposure to real-world development workflows.
